## 4020

### **BOARD DIPLOMA EXAMINATION, (C-14)**

#### MARCH/APRIL-2017

DCE—FIRST YEAR EXAMINATION

SURVEYING-I

Time : 3 hours ]

Total Marks : 80

#### PART—A

3×10=30

Instructions : (1) Answer all questions.

- (2) Each question carries three marks.
- (3) Answers should be brief and straight to the point and shall not exceed *five* simple sentences.
- **1.** Define surveying and levelling.  $1\frac{1}{2}+1\frac{1}{2}$
- **2.** Distinguish between plane and geodetic surveying.  $1\frac{1}{2}+1\frac{1}{2}$
- **3.** State any three purposes of chain surveying. 1×3
- **4.** Define ranging and state the methods of ranging. 1+2
- **5.** State and write the formulas for any two methods of calculating areas for the irregular boundaries in a chain surveying. 1+2

The length of a line measured with a chain of 30 meters was found to be 800 meters. The chain was found to be 15 cm too short. Find the true length of the line.

- 7. Convert the following whole circle bearings into quadrantal bearings : 1×3
  - *(a)* 163°45
  - (b) 293°15
  - (c) 84°45

3

1

- **8.** List all types of error in compass survey.
- **9.** The magnetic bearing of a line is 56°34. Calculate true bearing if the magnetic declination is 5°16 East.
- **10.** State various mined instruments used in surveying.

#### PART-B

Instructions : (1) Answer any five questions.

- (2) Each question carries ten marks
- (3) Answers should be comprehensive and the criterion for valuation is the content but not the length of the answer.

11.	(a)	Discuss in brief the principles of surveying.	2
	(b)	Write down the general classifications of survey based on all four ways.	8
12.	(a)	Explain the 3-4-5 method to erect a perpendicular to a chain line from a point on it.	4
	(b)	List out the instruments used in a chain survey and explain briefly the use of each instrument.	6
13.	(a)	Write various types of obstacle in chaining with an example of each type.	4

3

10×5=50

(b) A survey line BAC crosses a river, A and C being on the near and distant banks respectively. Standing at D, a point 25 meters measured perpendicularly to AB from A, the bearing of *C* and *B* are 320° and 230° respectively, *AB* being 75 meters. Find the width of the river.

[ Contd...

6

**14.** Plot the following cross-staff survey of a field *ABCDEFG* and calculate its area as shown in the figure below (in hectares) : 10

	750	D
	650	210 E
C 180	490	
	300	250 F
<i>B</i> 160	180	
	100	50 G
	0	Α

- **15.** (a) Write about (i) meridian, bearing and angle between survey lines and (ii) whole circle and reduced bearings. 2+2
  - (b) A line was drawn to a magnetic bearing of 230°45 on an old map, when the magnetic declination was 6°30 E. To what bearing should it be set now, if the present magnetic declination is 2°30 W?
- 16. What is closing error? Explain, how you adjust closing error by Bowditch graphical method.10
- **17.** The following bearings were observed in running a closed traverse :

Line	FB	BB
AB	124 30	304 30
ВС	68 15	246 00
CD	310 30	135 15
DA	200 15	17 45

At what stations do you suspect the local attraction? Determine correct bearings. 10

- **3.** (a) What is pantagraph? Explain with the help of a sketch the constructional features of pantograph.
  - (b) Write any three uses of 'Abney level'.
